

A SUMMARY OF SAFETY AND EFFECTIVENESS INFORMATION

Name of Device: Rexton's Long Life Rx-12 hearing aid.

Type of Device: In The Ear Hearing Aid – Substantially equivalent to other In The Ear (ITE) hearing aids.

Intended Use: To amplify and transmit sound to the ear.

Features: The Rexton Long Life Rx-12 is a full shell hearing aid utilizing a 675 battery and a low drain class D circuit. The combination of these two unique features gives the Rexton Long Life the ease of battery handling (a large 675 battery) and the benefits of extended battery life. These two features should make for a special product with-in the industry.

Assembly: Assembled from standard components which are widely utilized by other hearing aid manufacturers.

Technical Characteristics: Technical specifications were obtained in accordance with S3.22-1987 ANSI Specifications. Preliminary data sheets for the Rexton Long Life RX-12 models are enclosed.

Fit: The frequency response of this product is dictated by the individual audiogram from each client.

Power: Standard hearing aid battery, 675.

A user's manual and other information is supplied with each hearing aid.
